

CLEAN PARTITION

除塵淨化清淨機

ACP-898AH

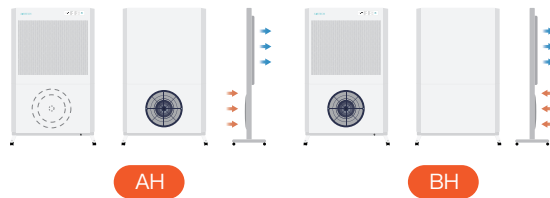

Antibacterial operation panel

Large area HEPA high efficiency filter

Lights indicate the life span of filter

4 models/2 types of airflow pattern

• Clean Air Blowing Type(Positive Airflow)

• Decontamination type(Negative Airflow)

Status indicator

Anti-collision rubber sheath

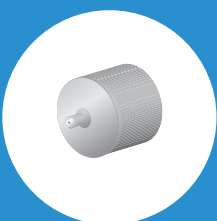

There have anti-collision rubber sheath above the casters, slow down the impact of collision, reduce the probability of device that topple over.

*There is no anti-collision device in the series of Model 897.

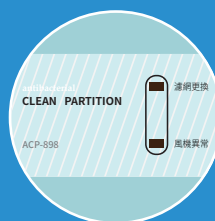

Antibacterial operation panel

The panel is brand-new constructed using antibacterial material, suppress the activity of bacteria that coherence to the operation panel effectively.

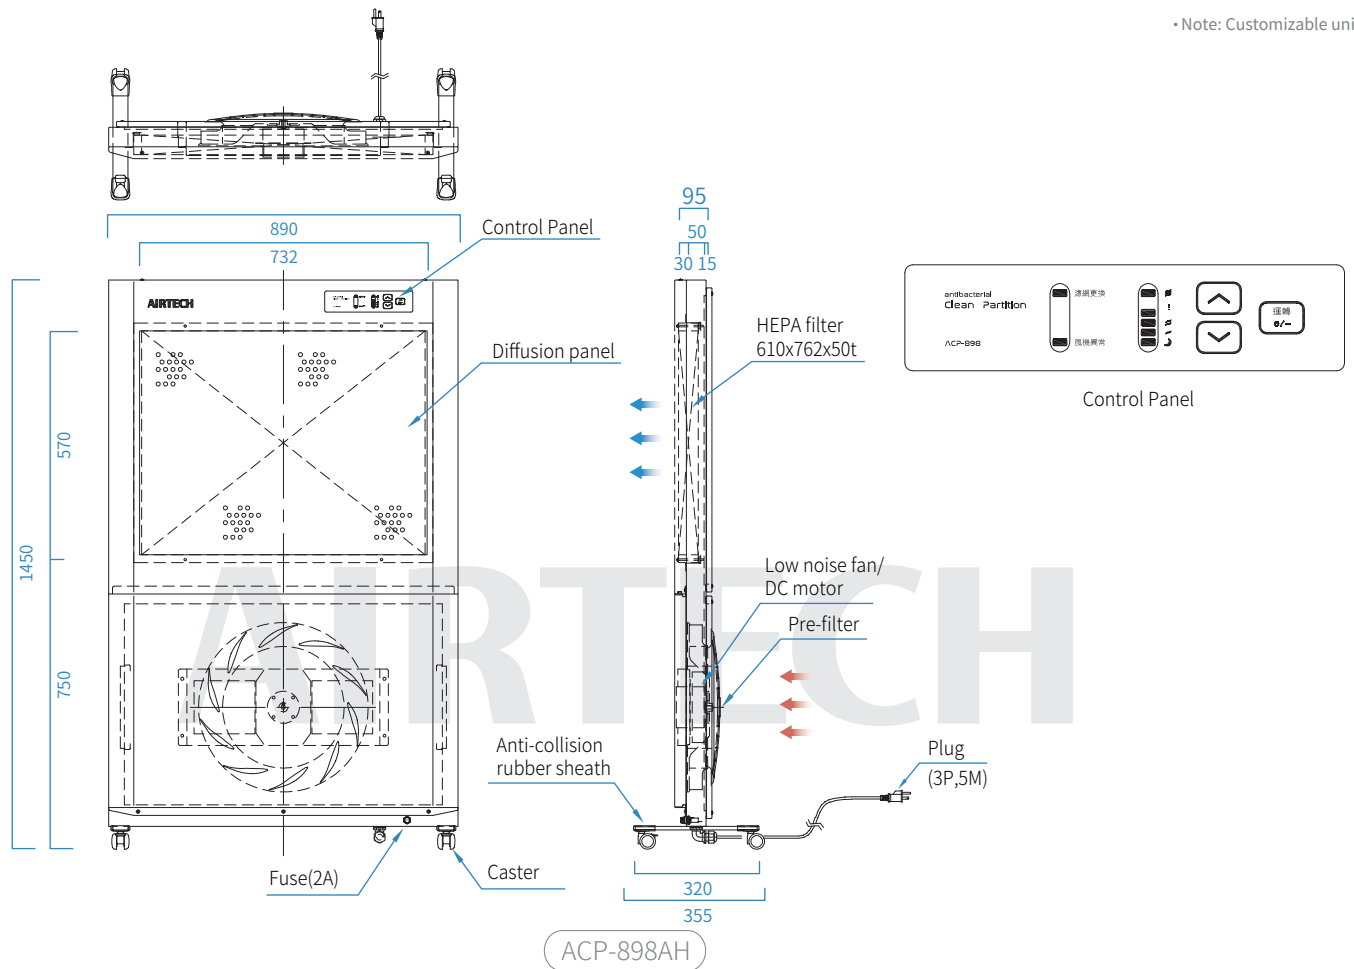

Energy-saving DC blower

Using high efficiency DC blower, low power consumption, high stability. It is the best choice for equipment system.

Lights indicate the life span of filter

Smart automatic detection about the life span of filter, indicator light color: Warning (yellow ●) / Replacement (red ●).

Specification

Model	ACP-898AH					
Particle Efficiency	Above 99.99% Efficient On 0.3µm Particles					
Main Filter	HEPA : 610x762x50t x 1pc					
Pre-Filter	Nelon Filter : Φ388x21H x 1pc					
Construction	Cold-rolled Steel With Bake Painting					
Volume Setting	Ultra	Hi	Me	Lo	Mute	
Air Volume(CMM)	12	6.5	5	4	3	
Air Velocity(m/s)	0.36	0.19	0.15	0.12	0.09	
Noise dB(A)	58	51	43	40	38	
Power Consumption	(W)	100	30	25	20	15
	(VA)	150	50	40	30	22
Electrical	AC 100V 1Φ 50/60Hz					
Weight(kg)	40					
Color	Pearl white / Dark grey					

Note: The product specifications change without notice.
